Weekly Coal Production

Production for Week Ended:
July 22, 1989

Preface

The *Weekly Coal Production (WCP)* report provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. This week's Coal Exports and Imports Supplement contains annual as well as detailed monthly data on U.S. coal and coke exports and imports. The other supplement contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price).

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as

specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1987*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800*.

Summary

U.S. coal production in the week ended July 22, 1989, as estimated by the Energy Information Administration, totaled 17 million short tons, a 22 percent increase from the previous week, but 2 percent less than the comparable week in 1988. Production East of the Mississippi totaled 10 million short tons compared to 7 million short tons in the previous week, a 39 percent increase and approximately the same as the comparable period in 1988.

The increase in production reflects the return to work on July 17 of most of the United Mine Workers of America (UMWA) miners following the 5-day work stoppage (memorial period) called the previous week. The UMWA left memorial periods standing in two districts covering northern West Virginia and parts of Ohio.

As of July 21, approximately 10 percent of the miners east of the Mississippi were involved in wildcat strikes. This number dropped to 2 percent on July 27.

Negotiations between the Pittston Coal Group and the UMWA continued the week of July 24, 1989. According to a Pittston representative, the negotiations were recessed the afternoon of July 27 and will resume on August 1.

U.S. coal exports for the first five months of 1989 (January through May) are over 20 percent greater (7 million short tons) than those for the comparable period of 1988, predominantly in response to higher demand from European metallurgical and steam coal markets.

Energy Information Administration Electronic Publication System(EPUB)

User Instructions

Selected energy data reports can be obtained electronically from the Energy Information Administration (EIA) Computer Facility. Public access to these machine readable statistics is possible by dialing (202) 586-8658 for 300 baud or 1200 baud line speeds. Communications are asynchronous and require a standard ASCII-type terminal. There is no charge for the service. Although there is no required password, you will be requested to use your telephone number as a user identifier. This service is available from 8 a.m. to 11 p.m. weekdays and 10 a.m. to 6 p.m. on weekends and most holidays. The Weekly Coal Production report is normally updated by 2 p.m. on Friday of each week. Allow one or two additional workdays in weeks containing holidays.

Access Instructions:

1. DIAL (202) 586-8658
2. HIT RETURN (CARRIAGE RETURN) TWO OR THREE TIMES UNTIL THE EPUB BANNER APPEARS
